Date: 07/14/2012 11:55 AM
Subject: Re: EPA Link for Dioxin in Soil

Dear Gloria and Stephen,

Has there been any further development on Arkwood's issues?

Have the groundwater/ "pilot study"/ onsite and offsite treatment questions been further addressed under the timeframes Stephen requested from Ada and McKesson?

Is there a timeframe for EPA finalization of the cancer toxicity value for dioxin?

And beyond that, how long will it take EPA to reassess Arkwood and amend the ROD, approximately, once the cancer toxicity value is ratified?

Just trying to get a better idea of what we're looking at for a general timeline, if possible.

Can my father still take guests onto the property?

If so, could we get the safety speech language directly from EPA, so it is definitely to spec and free of third-party rhetoric?

If not, at what stage will my father be able to resume visiting the site, alone or with visitors?

Thank you,

Curt

Thanks,
